

Title: Crappie Size Limit Season**The Problem:**

In the spring many fishermen actively fish for crappies, at a recent DNR Panfishing Hearing it was noted that over the last 60 years the average harvested crappie length has declined.

BE IT RESOLVED, that the Wisconsin Conservation Congress (WCC) at its annual meeting held in Oneida County on April 8, 2013, recommends that the Conservation Congress work with the Department to take action to require a size limit of 12 inches or greater on crappies from March 31st to June 1st. I would be willing to working with the WCC Committee on this issue, if they felt that the size requirement should be reduced or increased.
